

# THE OCTAHEDRON BOOK

4. Place the triangles next to one another to form a straight line.

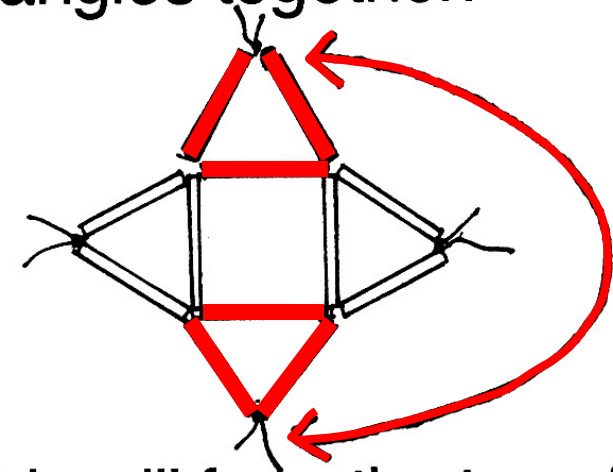

Tie the triangles together.

2. Tie the two strings together to form a triangle.

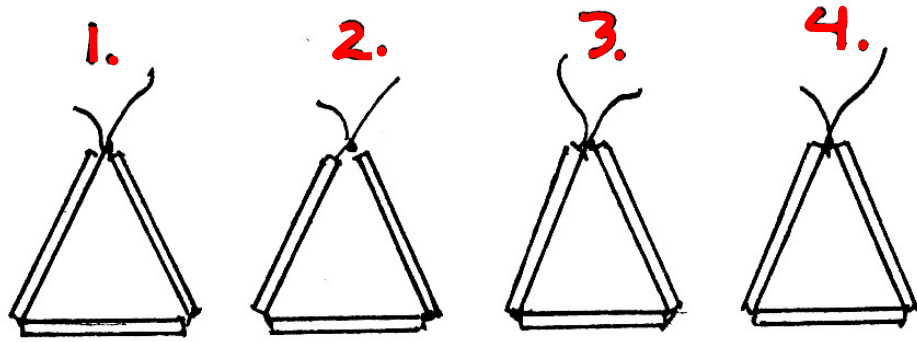

Make three knots.

6. Tie the top and bottom triangles together.

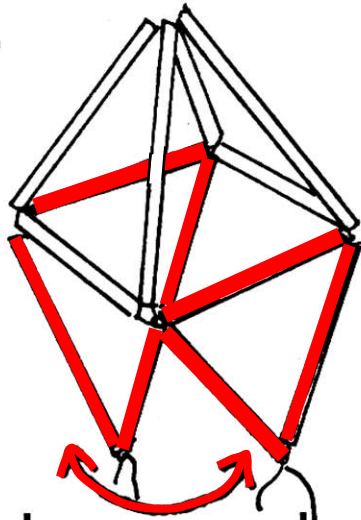

This will form the top of the octahedron.

3. Make three more triangles.

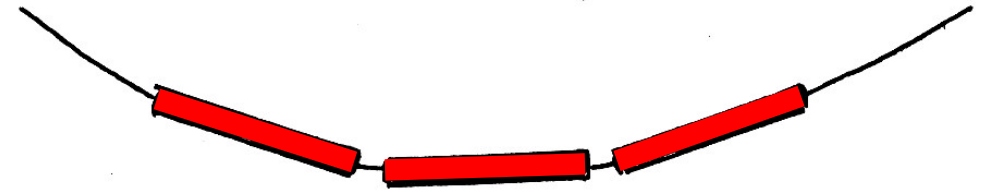

You will need four triangles to make an octahedron.

7. Tie the last two triangles together.

You now have made an octahedron.

1. Put three straws on a string.

5. Tie the two end triangles together. The triangles will form a square in the middle.
